| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | Extension of public sewer service to property is scheduled within the next 10 years. |

Comments:

Notes:

According to Hawaii County Code, Section 21-5 (Connection to sewer required), "Owners of all dwellings, buildings, or properties used for human occupancy, employment, recreation, or other purposes, which are accessible to a sewer are required to connect directly with the public sewer...". In addition, "The director may grant a variance/exemption of the foregoing connection requirements to owners of single-family dwellings...". Please refer to Section 21-5 of the County Code for additional details.

According to the Plumbing Code, a cleanout is required to be installed at the property line. In the event that a cleanout is not installed and it is determined that the property is currently connected to the sewer system, installation of a cleanout will be required.

Investigations of the connection status may be available through the Wastewater Division on a time available basis. Confirmation of connection status does not guarantee that all permits and approvals have been granted. Please contact the Wastewater Division for further information.

Requests for Public Information will be responded to within 10 days of receipt.
